Summary

Senior Product Designer who turns complexity into clarity. I combine design systems, user research, and AI-augmented workflows to ship features that hit business goals and delight users. From B2B SaaS to e-commerce platforms, I've driven measurable results across startup, scale-up, and enterprise environments.

Experiences

Sr Product Designer

Oplit, Paris

Sept. 2026 - Currently

- Leading product design at Oplit, a SaaS platform that optimizes production planning for industrial manufacturers (aerospace, luxury, automotive).
- Designing strategic features and improving existing ones through continuous discovery and user research.
 - *Result: 100% client satisfaction on delivered features.*
- Building and deploying the Design System across the product, structured for AI-powered design workflows. •
 - *Result: +30 to 50% increase in design execution speed.*
- Driving discovery on strategic opportunitie

Product Designer

PrestaShop, Paris

June 2022 - Sept. 2026

- Structuring and providing operational tools, templates and user data for the product team.
 - *Result: reducing the time to access to user insights by 91%, and take more informed decisions.*
- Management the evolution of our Design System (structuring, contributions, maintaining visual and functional consistency).
- Collaboration with cross-functional teams (product, tech, marketing) to ensure high product quality.

UX Designer

BeApp, Nantes

June 2021 - June 2022

- Designed products and services (mobile and desktop) for various customers (automotive, medical, weather, press).
- Organized and led co-creation and user-testing workshops.
- Participation in structuring the Design department (processes, methodologies, internal evangelization).
